Profile

Senior risk executive with 20+ years in banking, including 10 years in senior risk roles at Russian Agricultural Bank, one of Russia's largest state-owned banks. Combined mandate across financial risk (market, interest-rate, liquidity), counterparty and credit risk: designing control frameworks and limit systems, contributing to ICAAP and stress testing for material financial risks, and presenting the risk position to ALCO, credit committees and senior management.

Builds teams and risk infrastructure: led up to 55 risk professionals and delivered automation that cut credit decision time from 2 days to 15 minutes. Positions risk management as a partner to the business that enables balanced growth, not only as a protective function.

Career highlights

- **Governance.** Member of ALCO (2024–2026) and the Retail Business Development Committee (2022–2026); presented the risk position at credit committees for six years; built the bank's financial-risk control framework.
- **Limits & exposure.** Ran limit frameworks at three levels: market risk (VaR, BPV, stop-loss), retail credit (limit policy across the full product line) and corporate counterparties (derivative hedges: options, swaps, futures).
- **Capital & stress testing.** Key contributor to ICAAP for material financial risks (market, liquidity, interest-rate), including risk appetite; introduced bank-wide stress testing; reduced interest-rate risk by up to 20% through ALM.
- **Regulatory.** Personally took two Bank of Russia inspections through to a successful outcome; aligned financial-risk methodologies with Basel standards; coordinated IRB model development.
- **Operational risk.** Designated operational-risk officer for the financial-risk area; led the replacement of the application anti-fraud system, including vendor selection.
- **Risk infrastructure.** Automated credit decisioning (2 days → 15 minutes, ~100 FTE optimised), bureau reporting (2 days → 30 minutes) and daily risk reporting; replaced market-data sources lost in 2022.
- **People.** Led 55 specialists in retail risk and 15 in corporate risk; scaled the Financial Risk team through hiring and development.

Employment

Russian Agricultural Bank (Rosselkhozbank), Moscow — **Jul 2016 – Jul 2026**

Head of Retail Risk — **Sep 2022 – Jul 2026**
Head of Financial Risk (concurrent appointment) — **Dec 2024 – Feb 2026**

Mandate expanded from retail credit risk to the bank's financial risk; led both functions in parallel for 15 months.

Financial risk: market, interest-rate and liquidity risk

- Key contributor to ICAAP for the bank's material financial risks (market, liquidity and interest-rate risk), including risk-appetite metrics, limits and stress testing.
- Implemented a comprehensive financial-risk control framework (risk tools, models, methodologies, governance practices and management dashboards), improving transparency, oversight and regulatory alignment.
- Monitored market-risk limits (VaR, BPV, stop-loss) and automated the processing of non-standard deals.
- Established bank-wide stress-testing methodology for the impact of market volatility on the bank's portfolios, enabling proactive mitigation and more resilient capital planning.
- Reduced interest-rate risk by up to 20% by managing the maturity structure of assets and liabilities.
- Served as the designated operational-risk officer for the financial-risk area.

- Java (risk-reporting automation)
- Risk metrics: VaR, BPV, PD, LGD, EAD, cost of risk, approval rate
- Credit decision engines & scoring

Committees

ALCO
Dec 2024 – Jul 2026

Retail Business Development Committee
Sep 2022 – Jul 2026

Credit committees
Risk position presenter, 2016 – 2022

Publications

Digital2020 Conference
Moscow

- Strengthened and scaled the Financial Risk function through hiring, training and development of specialists.
- Partnered with IT and data teams to restore and replace market-data sources lost in 2022, safeguarding pricing integrity, valuation models and market-risk calculations.

Retail credit risk: mortgages, consumer loans, credit cards (55 staff)

- Owned credit-decision strategy and limit policy across the full retail product line; reported risk levels and the risk-strategy funnel to management.
- Moved to automated decision-making: manual underwriting reduced to nearly 0%, average decision time cut from 2 days to 15 minutes, enabling a headcount optimisation of about 100 FTE.
- Delivered +10 pp approval rate in 2023 under a revised risk strategy with no increase in risk (CoR on new originations below 1%).
- Coordinated IRB methodology and risk-model development (PD, LGD, EAD) for the retail portfolio.
- Led the replacement of the application anti-fraud system end to end: business requirements, external vendor selection and migration of business processes to the new platform.
- Cut credit-bureau data submission time from 2 business days to 30 minutes; integrated the decision engine with government data services (biometrics, digital profile) in full legal compliance.
- Built a new income-assessment model for smallholder-farm clients, improving estimation accuracy by 40% and expanding the rural client base.

Deputy Head of Corporate Risk, CIB — **Jul 2016 – Sep 2022**

Promoted Chief Specialist → Head of Unit → Deputy Head of Department; led a team of 15 corporate risk managers.

- Assessed the bank's credit and market risk exposure on complex transactions and presented the risk position at credit committees.
- Assessed and set limits on corporate clients' derivative hedging transactions (options, swaps, futures); initiated a review of hedging approaches that reduced the number of deals requiring back-to-back cover and freed limit capacity for derivatives.
- Structured financing for top-20 clients in the loan portfolio, including agribusiness and residential construction investment projects and M&A deals, with due diligence.
- Administered the credit policy and internal regulations; monitored branch lending, non-performing exposure and distressed-debt recovery strategy.
- Built a platform for recording and analysing Credit Risk Premium (CRP) values; automated daily risk reporting in Java, giving the department SLA control and sustaining 95% SLA compliance at peak load.
- Sector coverage: agribusiness, development and infrastructure, wholesale and retail trade, power generation, oil and gas, transport.

Russian commercial banks — **Jun 2005 – Jun 2016**

Financial Analyst → Head of Credit Unit

Corporate lending: progressed from financial analyst to head of the credit unit.
